

Tax and Corporate Consulting

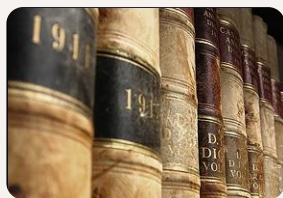

The constant evolution and complex articulation of the Italian civil and tax legislation are such as to require the provision of integrated enterprise projects. They are based on models of management and control appropriate to ownership structure and business objectives, they take into account of an efficient and effective tax planning.

The Firm advises its clients through business consulting and the development of technical and professional opinions on taxation and corporate, aimed at analyzing and resolving questions of interpretation of the relevant legislation, at optimizing business decisions of the customer.

The aim of the Firm is to highlight all the elements that characterize the operations of the enterprise, combining the entrepreneurial creativity with all the economic, financial and legal assessments, respecting the imperative to better manage the company's assets.

The preparation of the financial statements is performed in full compliance with specific attention to its information value, particularly relevant in dealing with corporate stakeholders and funders of the company.

The Firm has built up deep expertise in preparing of financial statements drawn up according to IAS/IFRS, as well as in preparing interpretative views concerning the international accounting standards and the relationship between these and the Italian civil and tax legislation.

The experience gained in this area makes it possible to assist its clients in preparing national reports data flowing to potential partners/foreign investors, which require the processing of business data according to international accounting standards.

The improvement of business performance for companies that want better compete in the market, internal and external, can not be separated from the optimization of corporate structure, by balancing the tax burden, the proper tax planning and evaluation of financial policies.

The Firm, therefore, drawing on the wealth of his many years of experience, develops with the client all the solutions most appropriate to its business and economic reality.

In particular, the services offered are

- ❖ Check-up administrative-accounting and support to ordinary taxation;
- ❖ Planning and optimization of taxation;
